# OUTRIGGER PADS

CUSTOM COMPOSITE & WOOD PADS

**RhinoGuard™ Outrigger Pads**, a trusted brand of **Driver Industrial Safety™**, provide a stable and secure foundation for heavy equipment in demanding environments. Available in high-performance composite and durable hardwood options, these pads are engineered to distribute weight evenly, protect ground surfaces, and enhance equipment stability.

Whether you're working on soft soil, gravel, asphalt, or concrete, RhinoGuard outrigger pads are built to perform under pressure—offering long-lasting strength and safety across construction, utility, mining, and industrial sites.

## RhinoGuard™ Outrigger Pads

## HIGHLIGHTS

- **Composite or Hardwood Options:** Select from high-strength composite or durable hardwood—each engineered for stability and long-term performance in rugged environments.
- **Easy to Transport and Position:** Built-in hand grips or rope handles make the pads easy to lift, carry, and position on-site.
- **Custom Sizes and Configurations:** Pads can be tailored to your specific size, thickness, and handle requirements to fit your equipment and job site needs.
- **Non-Conductive Composite:** Composite pads are non-conductive, making them a safe choice for utility and electrical applications.
- **Weather and Chemical Resistant:** Both materials are built to withstand water, oil, chemicals, UV exposure, and temperature extremes without degrading.
- **Crack and Warp Resistant:** Designed to resist cracking, splintering, or warping—even under repeated use and heavy loads.
- **Made in the USA:** Manufactured domestically with high-quality materials and strict quality control.
